

## WIWA Extrusion Pumps for low- to high-viscosity and pasty materials

# VULKAN THE POWER SERIES

VULKAN – The tried and tested WIWA Extrusion Pump for transfer, metering and application of adhesives, sealants and insulating materials.

The WIWA VULKAN Extrusion Pump program includes 22 pumps in six performance classes with diverse outputs and pressure ratios, making it one of the most extensive series worldwide.

Output per cycle up to 680 ccm

Pressure ratios from 16:1 to 94:1

Available in N = Carbon steel version R = Corrosion-resistant version

An equally wide ranging accessory program, including for example floor mounts, single-post and twin-post ram units in various sizes, follow plates and follow covers in all sizes and versions, as well as heating elements and other accessory kits round out the program.

## The tailored suit from the rack

- Based on the widely diversified pump and accessory program, an ideal combination can be produced for almost every application.
- Through modular design and the internationally proven WIWA unit construction system, additional customer requirements can easily be accommodated.
- Special solutions for coatings processes are a further service of the WIWA technical department.

# UNIQUELY VERSATILE

Robust and well thought-out. Versatile in application

Supplying work stations, robots and other application systems or ring mains with multiple dispensing stations are typical uses for the VULKAN Extrusion Pump Series. Depending on the viscosity of the transferred medium, the VULKAN Extrusion Pump can be outfitted with a ram unit or twin-post lift and follow plate or follow cover. A constant flow of material is assured through large material passages and the equal pressure and output in the upward and downward strokes. Due to the robust and sturdy design, the pumps of the VULKAN-Series have proven themselves in difficult tasks such as pumping high-viscosity materials over long distances. Further uses include the filling of pails, drums and bulk containers, as well as cartridges. With the modern design using the proven WIWA unit construction system and the extensive range of accessories, it is possible to offer the optimal and most economical solution for each area of application.

## Design Features of the WIWA VULKAN Series

### Air Motor:

- Pulsation is minimized by the high changeover speed of the air motor
- Quicker maintenance and easier assembly due to the use of fewer components

## Fluid Pump:

Less pressure loss with high viscosity materials due to large material passages

- The scoop-feed technique enables the pumping of low- to high-viscosity materials
- Precision guiding ensures simple and exact alignment of parts, as well as less wear and tear
- Seals in the threaded connections prevent them from sticking and ease disassembly
- Large material passages for high output with minimal pressure loss
- Carbon steel and corrosion resistant versions
- Hard chromed pistons and pressure cylinder

## THE PLUS POINTS:

- Maintenance-free, low-noise air motor
- Closed lubricant chamber separates the air motor and fluid pump. The lubricant prevents caking of the material on the piston and prolongs the life of the packings
- Pulsation is minimized by the high changeover speed of the air motor
- High operating pressures are suitable for the pumping of high-viscosity materials over longer distances
- Easy assembly provides for quicker maintenance
- Equal output and pressure for upward and downward strokes ensures constant material flow rate
- Diverse sealing systems and materials for differing applications

# VULKAN EXTRUSION PUMPS

Through modular design, an optimal solution is offered for every application

TECHNICAL DATA	
Pressure Ratio:	16:1 to 94:1
Output per Cycle:	49 to 680 ccm
Max. Operating Pressure:	128 to 474 bar
Max. Air Inlet Pressure:	8 bar

The WIWA Extrusion Pumps of the VULKAN Series are supplied in many versions with ram units, on lift trolleys or with floor mount for material supply from bulk containers and with extensive accessories for high flexibility and constant production parameters.

## **AREAS OF APPLICATION**

- Automobile industry
- Machine and vehicle manufacture
- Railcar manufacture
- Aircraft industry
- Marine- and offshore industry
- Wind energy
- Wood- and furniture industry
- Printing
- Window and door manufacture
- Manufacture and processing of silicon products
- Production lines in the chemical industry
- Processing adhesives and polyurethanes
- Lubricant technology (oil and grease transfer systems)
- Application of undercoating
- Spray and coating technology
- Manufacture and processing of paints and lacquers
- Transfer of raw materials for the production of adhesives, sealants and other chemical products
- Cartridge filling systems

## PUMPING MATERIAL AND PROCESSING MEDIA

- Adhesives and glues
- PVC and other sealing materials
- Grease and lubricants
- Printing inks
- Bitumen and undercoating
- Pasty coatings and other medium- to high-viscosity materials
- Sealants
- Mastics
- Silicones
- Butyls
- Urethanes
- Epoxies
- Acrylics

With over 50 WIWA Extrusion Pumps, Suzuki has realized an automated process which allows the fully automatic bonding of diverse components to form a complete auto chassis.

## **PERFORMANCE DATA**

## WIWA-VULKAN

## For the transfer, metering and application of low- to extremely high-viscosity materials

Double ram system with automatic switchover

.

### SPECIAL SOLUTIONS

### WIWA Dual Ram System

At Suzuki in Hungary, the Dual Ram System has been employed with much success.

An automatic switchover provides for activation of the second Ram Unit upon complete emptying of the drum, ensuring a constant flow of material at all times.

The process must not be interrupted to change drums, since the pumps are automatically switched to the full drum.

## ACCESSORIES

# THE WIWA VULKAN ACCESSORY

**Optimum Process Results with the Proper Accessory Equipment** 

WIWA Ram Units for precise and orderly transfer from supply containers and fast container changes

Twin-post Ram Unit ZSR250 (2.5 to.)

Twin-post Ram Units for small supply containers up to 216 L capacity and 280-571.5 mm inside diameter

Twin-post Ram Units ZSR		
Model	Order No.	
ZSR250 (2,5 t)	0642750	
ZSR075 (0,75 t)	0634941	
ZSR030 (0,3 t)	0640830	

Single-post Ram Units with Regulator

Single-post Ram Unit 0.375 to. for small supply containers up to 60 L capacity and 280-355 mm inside diameter

Single-post Ram Units ESR			
Model Order No.			
ESR0375/216 (0,375t) 0640009			
ESR0375/60 (0,375t) 0640604			

Mobile Twin-post Ram Unit with regulator and automatic shut-off

Twin-post Ram Units on mobile cart for small supply containers up to 60 L capacity and 280-355 mm inside diameter

Mobile Twin-post Ram Units		
Model	Order No.	
H250/R (2,5 t)	0644756	
H075/R (0,75 t)	0647510	
H030/R (0,3 t)	0640882	

Air Maintenance Units		
Model Order No.		
G 1/2" 0629947		
G 1" 0623261		

### WIWA Follow Plates and Follow Covers

Prevents suction air pockets for constant fluid output. Additionally, protects the material from dust, moisture and hardening through contact with air.

Standard Follow Plate for 216 L Drum

Heated Follow Plate for 216 L Drum

Follow Plate for 216 L Drum with double seal ring

#### **Optional:**

- Reinforced double seal ring
- Double Wiper Ring
- Teflon Coating
- Heating for all Follow Plates w/ various performance levels

Follow Plate for 216 L Drum		
Model	Order No.	
for 216 L Drum standard	0644762	
for 216 L Drum elec.heated	0646505	

Standard Follow Plate for small supply containers up to 355 mm inside diameter

Follow Plates for small contai- ners from 20 to 60 L capacity		
Model Order No.		
ø 280 mm	0639937	
ø 282 mm	0641706	
ø 283 mm	0642469	
ø 285 mm	0640624	
ø 287 mm	0640573	
ø 295 mm	0642905	
ø 300 mm	0642908

ø 328 mm	0642020	
ø 350 mm	0642694	
ø 355 mm	0641616	

Minimum Residue Follow Plates in flat version for small containers

Minimum Residue Follow Plate for small containers		
Model	Order No.	
ø 280 mm	0644154	
ø 284 mm	0643916	
ø 285 mm	0644101	
ø 285,7 mm	0643896	

Standard version in aluminium. Optionally supplied in stainless steel.

All Ram Units shown can be supplied in free-standing or mobile version .

## PROGRAM

## Customer requests for special solutions are a WIWA specialty.

Standard Follow Plate for 30 kg Container

r		
Standard Follow Cover for 20 kg to 80 kg Container		
Model	Order No.	
for 20 kg container (ø 270-305 mm)	0642176	
for 30 kg container (ø 300-330 mm)	0646422	
for 60 kg container (ø 330-360 mm)	0646434	
for 80 kg container (ø 360-385 mm)	0646143	

Follow Cover for 216 L Drum standard version

Follow Cover for 216 L Drum					
Modell	Order No.				
for 216 L	0607819				

Minimum Residue Follow Cover for containers up to 60 L capacity

## Minimum Residue Follow Cover

101 20 L 10 00 L	
Model	Order No.
ø 205-235 mm	0646740
ø 270-300 mm	0647007

### Extrusion Guns

Extrusion guns for high viscosity, extrudable material, for example thermoplasts, elastomers, silicones, greases, adhesives and glue. Max. operating pressure: 500 bar. Tip sizes: see table

Extrusion guns and Swivels			
Model	Order No.		
Extr. gun	0631299		
Swivel (straight)	0631300		
Swivel (Z-link)	0631301		

## Floor Mount

For connecting Extrusion Pumps to tanks, bulk supply containers, etc.

Order No.: 0646362 (for SKP 680/120)

Drum holding ring

Drum holding ring for precise positioning

Drum holder ring (216 L Drum)				
Model	Order No.			
for 216 L drum for ZSR075	0634949			

## **Special Accessories**

#### Heated pumps

Electrical pump heating upon request

### Heated hoses

**Drum Level Indicator** 

• Drum empty – shut down. Automatic shutdown when container is empty

### **Switchover Device**

- Automatic switching for dual ram systems for uninterrupted processing of material
- Two-hand operation for safety

Tip diameter in mm	1,0	1,5	2,0	2,5	3,0	3,5	4,0	5,0	6,0	10,0
